

How to assess and fight against the effects of global warming on heritage?

- ✓ Need for input data
 - Climate? Downscaling ?
 - Outdoor/indoor?
 - Synergy with air quality?
 - Biological colonization?
- ✓ Degradation of cultural heritage
 - Sufficient knowledge on mechanisms?
- ✓ How to predict the impacts to better preserve cultural heritage?
 - Case studies on past disasters
 - Dose-response functions
 - Geochemical models

From research to actions...

- How to identify the main risks?
- How to articulate research and policy action?

Effects of CH on global warming

- What is the impact of CH on greenhouse gases emissions?
- How to reach carbon neutrality?
